presented by a device-connected remoting system (DCRS), wherein each of the computer and device emulations communicate with each other. The description of the CCRS and DCRS systems is detailed in Figure 7 and from page 9, lines 1 through page 11, line 10 of the Specification, wherein a local emulation of the controlling computer is provided to the remote device, and a local emulation of the remote device is provided to the controlling computer.

In another embodiment of the present invention, claim 11 recites the handling of Time-Dependent and Non-Time Dependent responses for communicating between a computer emulation means and an electronic device, as described in the Specification on page 7, lines 9-16, and page 11, line 16 through page 12, line 3.
